29.     The BASIC system was developed by two university professors at _____.

        a.      Princeton
        b.      Dartmouth
        c.      MIT
        d.      Berkeley
        e.      Texas Tech

30.     In addition to software sharing challenges, the timeshare system gradually declined as

        a.      hardware became cheaper
        b.      computers became smaller
        c.      wireless services increased
        d.      privacy concerns expanded
        e.      coding became more sophisticated

31.     MULTICS was created by all of the following entities EXCEPT

        a.      General Electric
        b.      MIT labs
        c.      AT&T
        d.      Bell Labs
        e.      General Motors

32.     Which of the following BEST describes a daisy wheel printer?

        a.      It can print images.
        b.      It strikes many tiny pins against an ink ribbon.
        c.      It works like a dot matrix printer.
        d.      It is an early laser printer.
        e.      It operates like a typewriter.

33.     The PDP-1 and PDP-8 were developed by

        a.      Kenneth Olsen
        b.      John Kemey
        c.      Grace Hopper
        d.      Thomas Kurtz
        e.      Fernando Corbató

34.      The PDP-11 was rolled out in which year?

        a.      1955
        b.      1962
        c.      1970
        d.      1977
        e.      1985
